- Represents zero events.

¹ Seven births where sex of child was not reported are included in the totals.² In 2000 there were five quintuplet births.

Note: Beginning with the 2000 data, race reporting changed to allow the reporting of up to three races. The race groups on this table generally correspond to the first listed race. The effect of this change in reporting race and in compiling race groups may not be clear for a few years, so trends should be viewed with caution. See Vital Statistics of California, Chapter 6.
